I’m a character animator who tells stories through pacing and movement.

I have over 10 years of experience working at a production company, collaborating closely with creative directors and taking on a wide range of roles within the production pipeline.

At Sauvage.tv I’ve been involved in different stages of animation production. I have a strong understanding of how images, sound, and motion work together to convey emotion in service of the story. I know how to use composition, camera movement, and cinematography as narrative tools.

The last 3 years I have been working as a character animator on Heartsteel – Paranoia music video, Subway Surfers City cinematic trailer, and Starlux Airsorayama safety video.

Beyond character animation, I’m comfortable handling:

- Animation direction
- Animatic / Layout / Previs
- Storyboard
- Character design
- FX animation
- Clean-up
- Editing + SFX

Tools
Blender, TVPaint, Moho, Harmony, Adobe Suite.. I pick up software quickly.

Availability
I’m currently open to remote opportunities.

Thank you for considering my profile.

Cheers!
Pau
